

"Purchase Management plugin for RISE CRM"

Created: 2022-09-14
By: greentech_solutions
Email: sales@gtssolution.vn

Thank you for choosing the Purchase Management plugin for RISE CRM. If you have any questions that are beyond the scope of this help file, please feel free to email us via the support item on Codecanyon.

A) Upload & activate the plugin

* Prior to starting the installation, please make sure that no `open_basedir` restriction is applied to your PHP configuration and that `shell_exec` is enabled. Whereas 95% of the hosting providers around got a proper config that includes the above guides, you may need to adjust your PHP configuration settings if your provider offers these settings disabled by default.

- Steps of Installation:

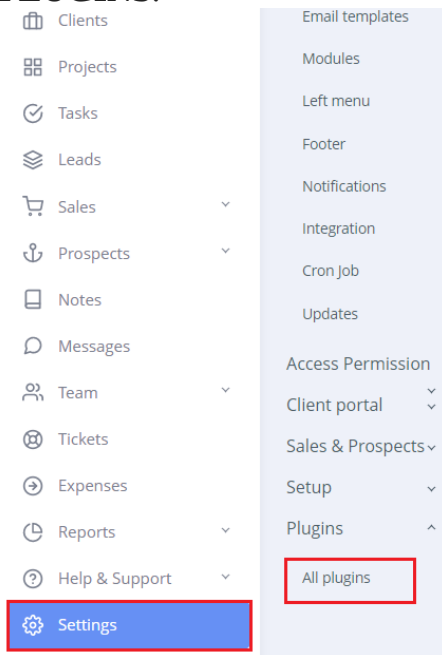

1. Extract your downloaded file content. You will notice a folder called "**documentation**" and a new zip file called "**upload.zip**". Since the "**documentation**" folder contains documentation files and helpful instructions that are not needed in your RISE CRM's installation, we will focus on the "**upload.zip**" file.

Name	Size	Packed	Type	Modified	CRC32
..			File folder		
documentation			File folder	09-May-20 7:2...	
upload.zip	89,929	83,101	WinRAR ZIP archive	09-May-20 8:0...	0F3E5E9E

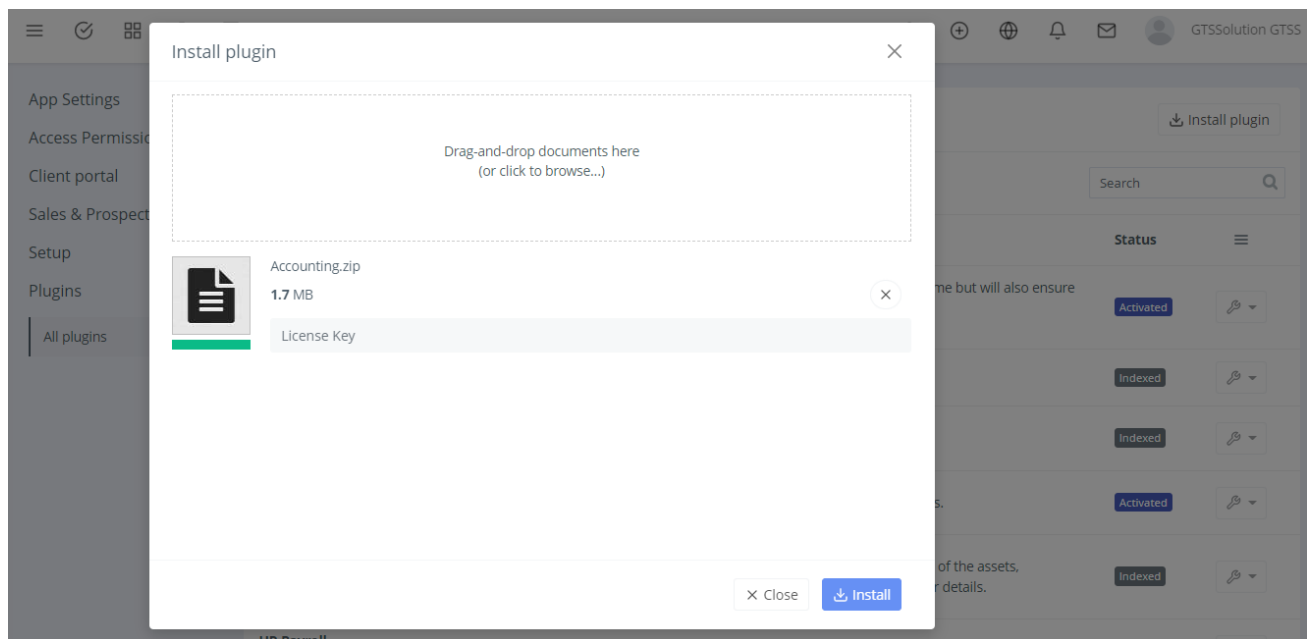

2. "**upload.zip**" contains the plugin files (in a plugin format) that you upload in RISE CRM's Plugin installation section.

Name	Size	Packed	Type	Modifi
..			File folder	
documentation			File folder	09-Mi
upload.zip	89,929	83,101	WinRAR ZIP archive	09-M

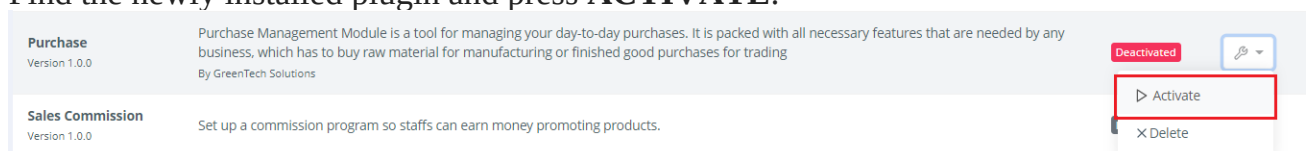

3. Go to your RISE CRM's Admin area and select the following menu item: **SETTINGS > PLUGINS.**

4. Select the extracted **upload.zip** at the Plugin installation selection prompt and press **INSTALL.**

5. Find the newly installed plugin and press **ACTIVATE.**

6. You will be told that the plugin is successfully activated.

B) How to use the Purchase Management plugin

1. Setting

1.1. General Settings

Used to configure the prefix, Terms & Conditions, and Vendor Note

* Explain the meaning of the fields :

- The Purchase request number prefix field is used to enter the prefix displayed in the Purchase Request Code field in the purchase request form
- Next purchase request number field: Set this field to 1 if you want to start from scratch, and it will automatically increment by one once a purchase request is made.
- The Purchase order number prefix field is used to enter the prefix displayed in the Purchase order number field in the purchase order form
- Next purchase order number field: Set this field to 1 if you want to start from the beginning, and it will automatically increase 1 unit after there is a purchase order created.
- The Purchase invoice prefix field is used to enter the prefix displayed in the Invoice number field on the purchase invoice
- Next Invoice Number field: Set this to 1 if you want to start from scratch, and it will automatically increment by one once an invoice is generated
- Terms & Conditions field: create default content for Terms & Conditions used in the menu: Quotation, Purchase order, Debit Note, Purchase Invoice
- Vendor note: create default content for Vendor notes used in menus: Quotation, Purchase order, Debit Note, Invoice

1.2. Purchase Options

Select menu Settings → Purchase Options

*Explanation:

- **Not create Purchase request, Quotation:** If you enable this setting, there is no need for a Purchase request and Quotation when creating a Purchase order.
- **Load items by vendor** field: If you enable this setting, when creating a purchase order or Quotation, the items will load according to the selected vendor. Conversely, if this setting is not enabled, all existing items will be displayed.
- **Show TAX per item** field: If you enable this setting, show the Tax column in PDF, view detail PO and Quotation screens.
- **Only show prefix & number on the Purchase order number** field: If you enable this setting, the Purchase order number field consists of 2 components: prefix - number - vendor code. If you do not enable this setting, the Purchase order number field includes the following components: prefix - number - month - year - vendor code

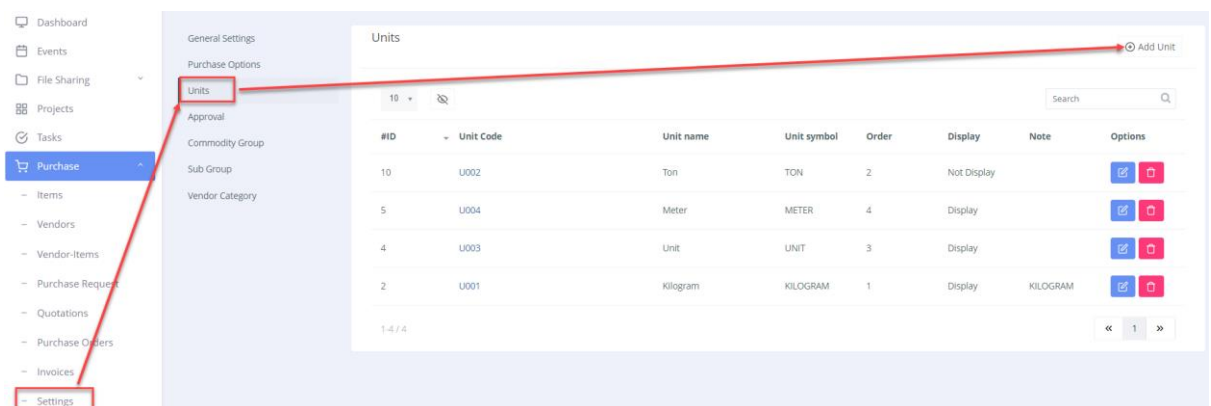

1.3. Units

The data set used in the item creation screen

1.3.1 Add Unit

Step 1. Select the Settings menu -> select the Units menu

Step 2. Click the Add unit button

Step 3. The system will display the Add Unit -> Import screen. Necessary data -> Then select Save to save the operation just done or select Close to cancel the operation and return to the previous screen

Add Unit

×

* Unit Code

Unit Code

* Unit name

Unit name

Confirm

- Select the Mass checkbox to delete the selected items
- Select change item selling price to change the selling price of the selected items-> Then enter a value > 0 to increase the selling price or enter a value < 0 to decrease the selling price

For example, enter ten, then the selling price of the selected item increases by 10%.

Enter -10, then the selling price of the selected item will decrease by 10%

- Select change item purchase price to change the purchase price of the selected items-> Then enter a value > 0 to increase the purchase price or enter a value < 0 to decrease the purchase price

For example, enter 10, and the purchase price of the selected item will increase by 10%.

Enter -10 to reduce the purchase price of the selected item by 10%

3. Vendors

3.1. Add vendor

- Step 1: Select the Vendors menu-> Select the Add Vendor button

The screenshot shows the 'Vendors' management interface. The left sidebar menu has 'Vendors' highlighted. The main panel displays a table of vendors with the following data:

#ID	Company	Primary contact	Primary email	Phone	Active	Date Created	Options
2	CENCUP COMPANY				1	2022-06-16 02:07:35	
1	SSLC			+1 (603) 578-1842	1	2022-06-16 01:54:38	

At the bottom of the table, it shows '1-2 / 2' and pagination controls with '1' selected.

- Step 2: The system will display the Add vendor-> Enter necessary data -> Then click Save to save the operation or click Save & create contact to save the action and redirect to the contact creation screen.

1-2 / 2

« 1 »

- Step 2. Navigate to the Profile screen → update profile information -> Click Save to save changes

The screenshot shows a web interface for managing vendors. On the left is a sidebar menu with options: Profile, Contacts, Quotations, Contracts, Purchase order, Purchase Invoice, Debit Notes, Purchase Statement, Payments, Expenses, Notes, and Attachments. The main area is titled 'Profile' and has two tabs: 'Vendor details' (active) and 'Billing and Shipping'. The 'Vendor details' tab contains several input fields: 'Vendor code' (VENDOR001), 'Company' (SSLC), 'VAT Number' (03031-2328), 'Phone' (+1 (603) 578-1842), 'Website' (empty), 'Vendor Category' (Vendor category 1), and 'Currency' (EUR). To the right of these are fields for 'Address' (10 Northern Boulevard, Suite 1, Amherst), 'City' (Hadley), 'State' (New Hampshire), 'Zip Code' (1035), 'Country' (USA), 'Bank detail' (empty), and 'Payment terms' (empty). A blue 'Save' button is located at the bottom right of the form.

3.2.2 Contact

There are two ways to add new contacts

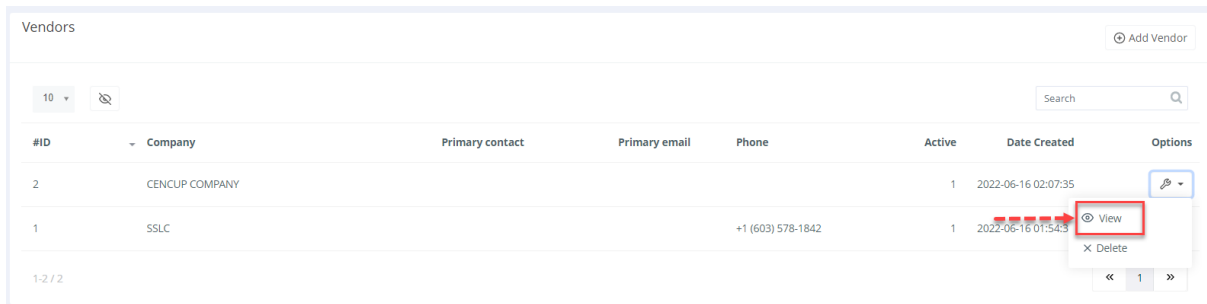

Method 1. Add a new contact from the Add New Vendor screen by clicking the Save & create contact button

This screenshot shows the 'Add New Vendor' form, which is identical in layout to the previous one but with empty input fields. A red dashed arrow points from the bottom right towards the 'Save & create contact' button, which is located next to a 'Save' button.

Method 2. Add a new contact from the vendor details screen

3.2.2.1. Add New Contact

- Step 1. At the Vendors screen -> Select the corresponding vendor line -> Select the View function

#ID	Company	Primary contact	Primary email	Phone	Active	Date Created	Options
2	CENCUP COMPANY				1	2022-06-16 02:07:35

- the Team field ticket: get data from Settings -> Access Permission -> Team screen
- Sale estimate: get data from Prospects/ Estimate List. Select 1 estimate, then automatically display the items of the selected estimate
- Sales invoices field: get data from the Sales/Invoices menu. When the user selects an invoice, it automatically displays the items of the selected invoice.
- Type field: includes two default types, CAPEX and OPEX
- Currency field: get data from Settings->Localization screen. The currency is taken in the main currency of the last selected Item/Sale Estimate/ Sale invoice.

- Project field: get data from the Projects menu
- Requester field: select the person requesting the purchase. This field data is taken from the staff list
- . Share to vendors field: select the vendor that will share this offer. Data were taken from the Vendor screen of the Purchase module
- Description field: used to enter a description for the offer (if any)
- **Select item** is used to select an available item to add to the offer. The data is taken from the Items screen and only displays the items with the Can be purchased
- . The **Unit price** is used to enter the purchase price of the item. The data in this field will take the value in the Purchase price field of the selected item to display. The Unit Price column allows editing
- of the **Quantity** used to enter the Quantity to be purchased.
- The Subtotal field is used to calculate the total value of the item before tax. Subtotal = Quantity* Unit Price
- The Tax field is used to calculate the item's tax. Tax = Quantity* Unit Price * Tax %
- The total field is used to calculate the total value of the item after tax

5.1.2. Method 2: Create purchase request from sales estimate

Step 1: Select menu Purchase request-> Select Add Purchase Request button

The screenshot shows the 'Purchase' menu on the left with 'Purchase Request' highlighted. The main area displays a table of purchase requests. A red dashed arrow originates from the 'Purchase Request' menu item and points to the 'Add Purchase Request' button in the top right corner of the table.

Purchase Request Code	Purchase Request Name	Requester	Team	Request date	Status	PO No.	Options
#PR-0001-2022	454	GTSSolution GTSS	Customer Service	2022-06-21	Approved		
#PR-0002-2022	PR12	test9.gtssolution	Customer Service	2022-06-21	Draft		

- Step 2: The system will display the screen Add New Purchase Request-> Enter required data, select Sale estimate -> Then click Submit to save the operation

The screenshot shows the 'Add New Purchase Request' form. The 'Sale estimate' dropdown menu is highlighted with a red box. The form includes fields for Purchase Request Code, Name, Team, Type, Currency, Project, Requester, and Description. Below these fields is a table for items to be purchased.

Item	Unit Price(EUR)	Quantity	Subtotal(EUR)	Tax	Tax Value(EUR)	Total(EUR)
Fax Machine	2000.00	1	2000	15%	300	2300

Summary:

Subtotal	2000	EUR
Tax(15%)(15%)		EUR300.00
Total	2300	EUR

*Explanation:

- Sale estimate field: get data from Prospects/ Estimate List. Select 1 estimate, then automatically display the items in the selected estimate

5.1.3. Method 3. Create a purchase request from a sale invoice

Step 1: Select the Purchase request menu-> Select the Add Purchase Request button

Purchase Request Code	Purchase Request Name	Requester	Team	Request date	Status	PO No.	Options
#PR-0001-2022	454	GTSSolution GTSS	Customer Service	2022-06-21	Approved		
#PR-0002-2022	PR12	test9 gtssolution	Customer Service	2022-06-21	Draft		

- Step 2: The system will display the Add New Purchase Request screen-> Enter the required data, select Sale invoices -> Then click Submit to save the operation

Item	Unit Price(USD)	Quantity	Subtotal(USD)	Tax	Tax Value(USD)	Total(USD)
Item Name		Unit		No tax		
Item 1	100.00	20	2000	10%	200	2200

Subtotal	2000	USD
Tax (10%)(10%)		\$200.00
Total	2200	USD

*Explanation:

- Sale invoice field: get data from Sales/ Invoices. Select an invoice, then automatically display the items of the selected Invoice

5.2. Edit Purchase request

*Note: Only purchase requests whose status is Draft and Rejected have the editing function.

Step 1: At the Purchase Request screen-> Select the corresponding line you want to edit -> Select the Edit function

Send approval request

* Explanation:

Tab Information: display purchase request information

Tab Attachment is used to upload attachments

Button Send approval request is used to send purchase request approval

5.6. Send approval request and approve

There are 2 cases:

Case 1. No approval process installed ⇒ After creating a successful Purchase request, this purchase request defaults to approved

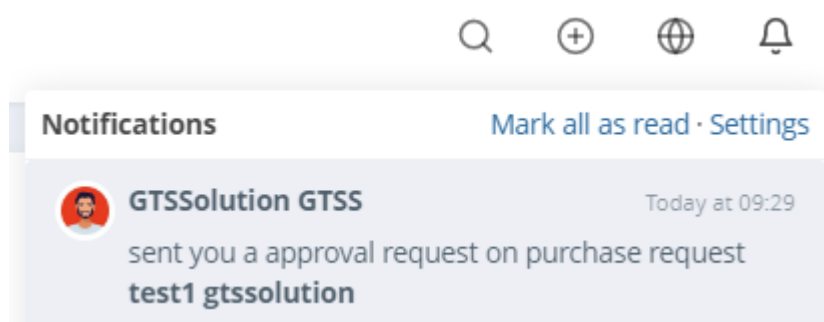

Case 2. There is a set process for approval After creating a Purchase request If successful, this purchase request defaults to Draft

Step 1: Select the purchase request as Draft -> Click View

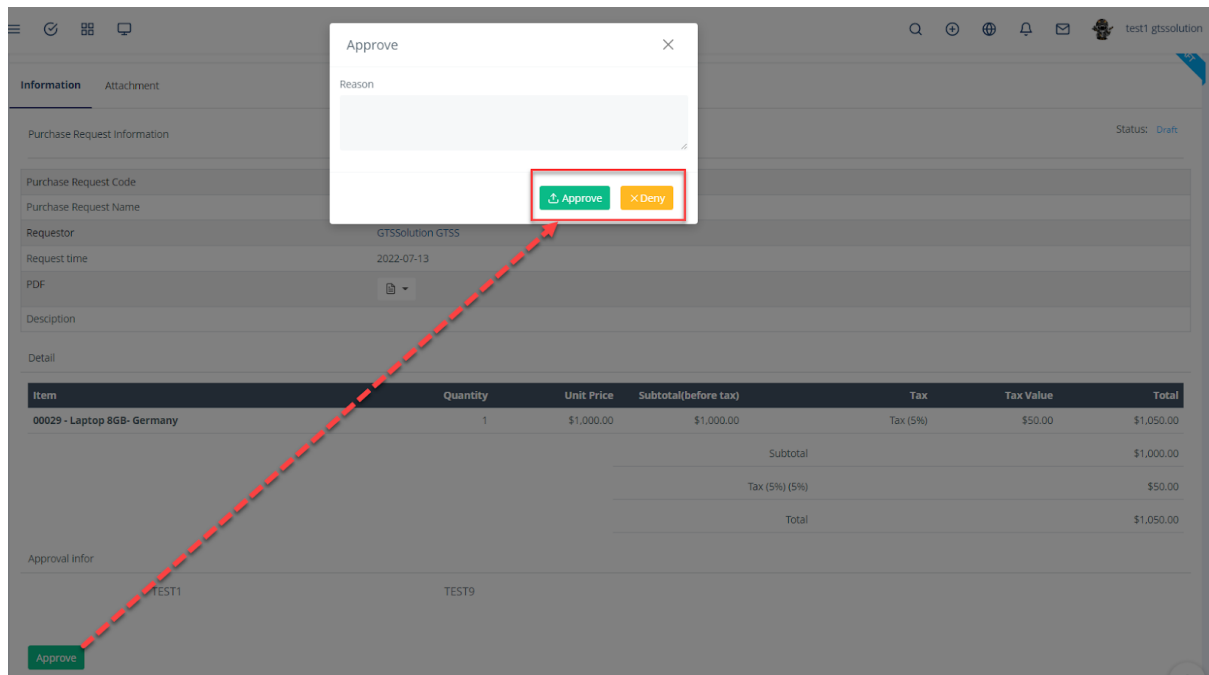

Step 2. : Click

❖ For the approval process, select a person to approve

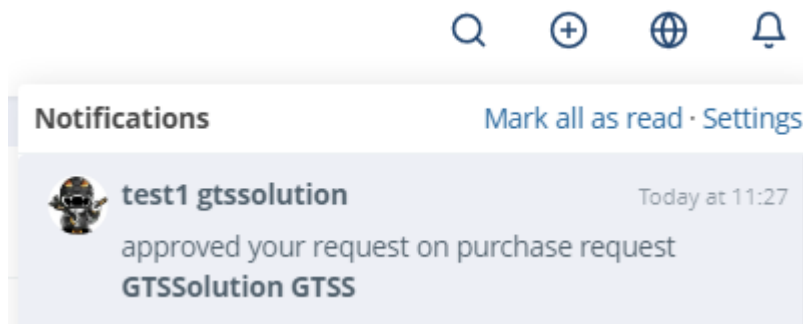

- The system sends an approval request to the person in the process. The approver in the process receives a notification requesting approval via email and web ->. Proceed to select the notification or go to the Purchase request screen and view the purchase request details to be approved

- Select the Approve function -> system will display two options, Approve and Deny.
 - + Select Approve to agree and enter a reason (can be entered or not) → Purchase request status changes from Draft to Approve
 - + Select Deny to refuse and enter a reason if any → Purchase request status changes from Draft to Reject.

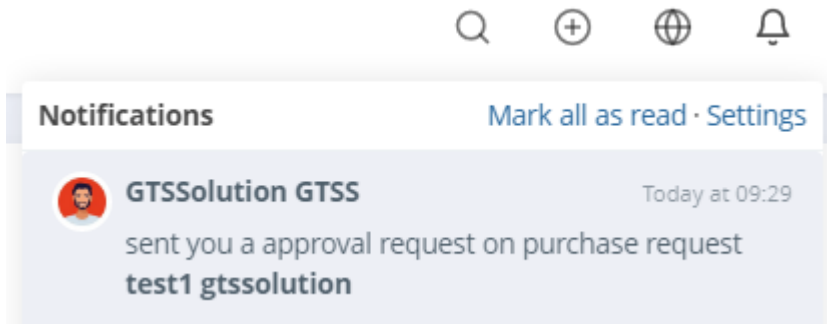

Purchase request creators also receive email and web notifications when they Approve or Deny

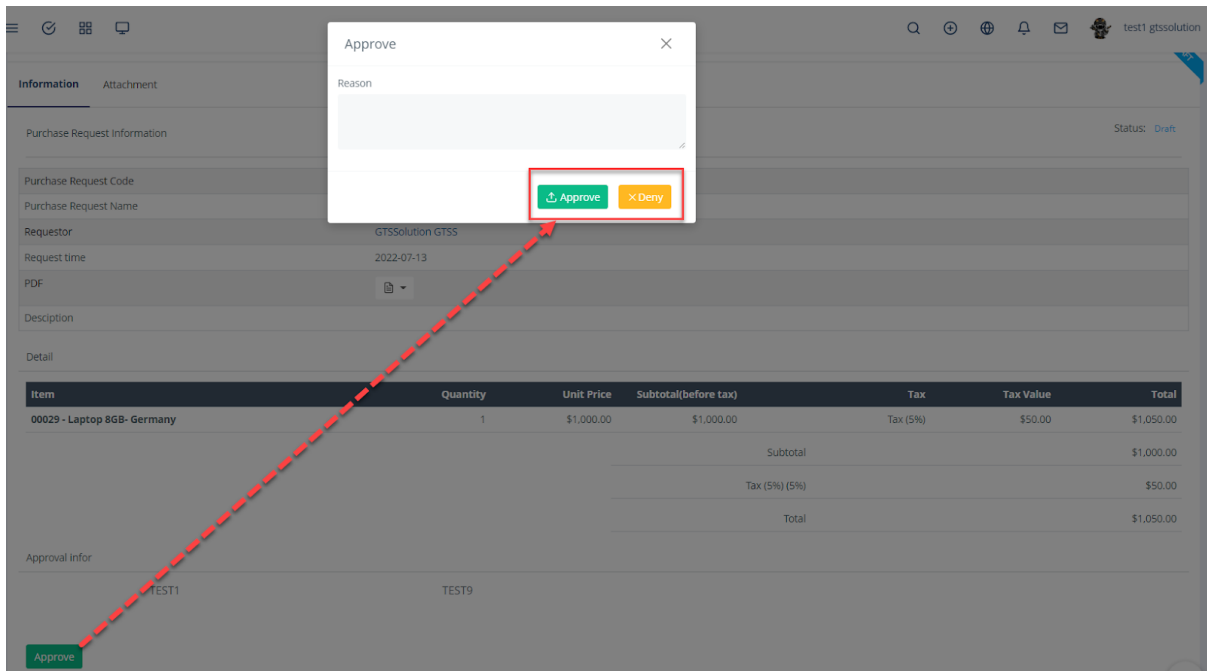

❖ approval

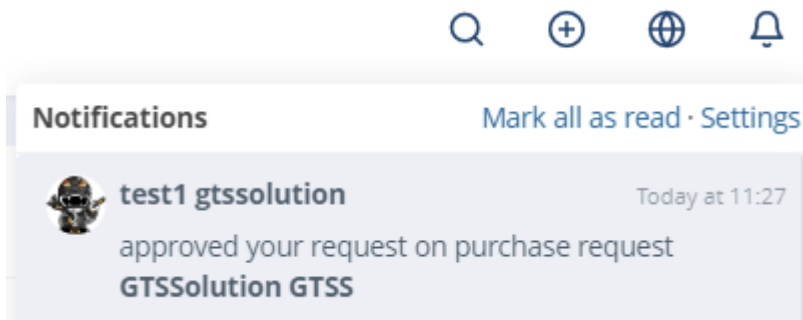

- Is available and web -> Proceed to select the notification or go to the Purchase request screen and view the purchase request details to be approved.

- Select the Approve function -> the system will display two options, Approve and Deny.
 - + Select Approve to agree and enter a reason (can be entered or not) → The purchase request status is still Draft, and the approval request is sent to the next person in the process. The next person proceeds to approve and approve and so on until all approve, then the purchase request status changes from Draft to Approve.
 - + Select Deny to decline and enter a reason (can be entered or not) → The next person in the approval process did not receive the approval request message and cannot continue to approve this purchase request. Status changed from Draft to Reject

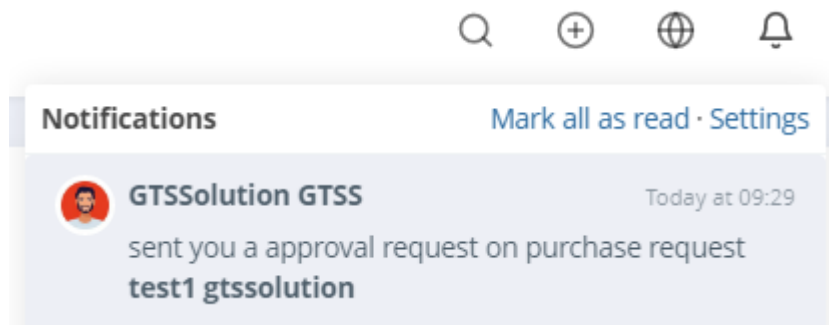

Purchase request creators also receive email and web notifications when they Approve or Deny approval

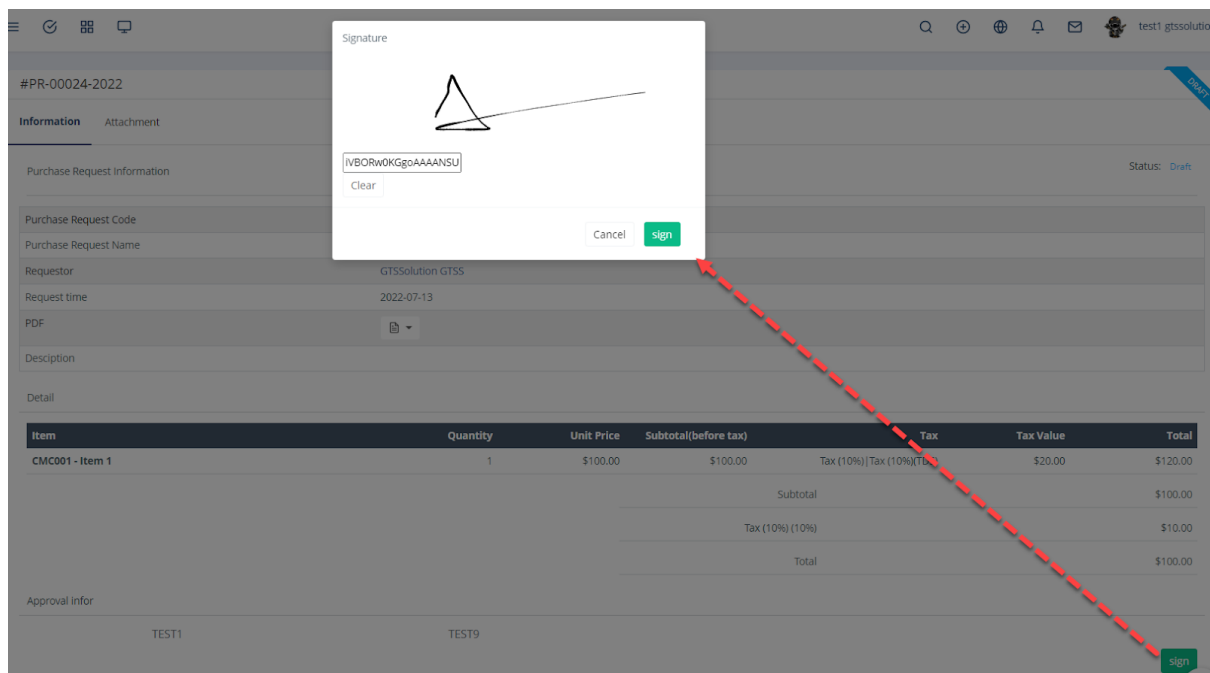

❖ For the approval process, select one signer

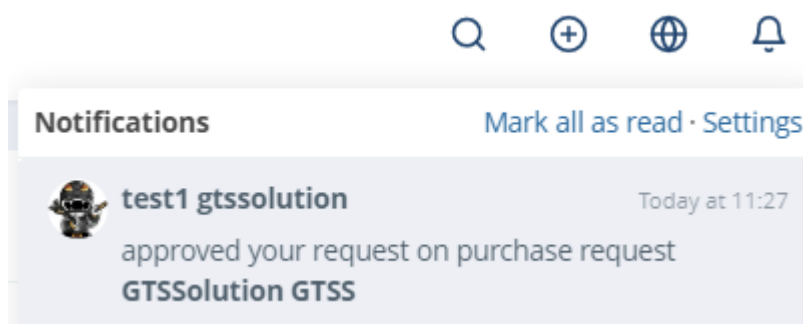

The system sends approval requests to insider procedure. The approver in the process receives a notification requesting approval via email and web ->. Proceed to select the notification or go to the Purchase request screen and view the purchase request details to be approved

- Select the sign button -> the system displays a popup Signature
 - + Draw a signature, then press sign → Purchase request status changes from Draft to Approve
 - + if you click Cancel, the purchase request status is still Draft

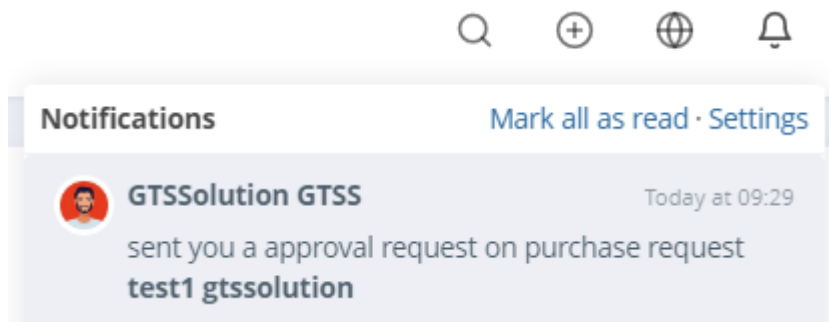

Purchase request creators also receive email and web notifications when Approve is approved or Deny

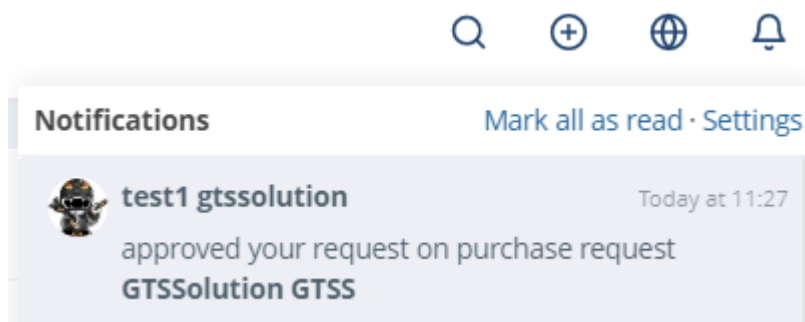

- ❖ For the approval process, select multiple signers

Only the first person in the approval process will receive a notification requesting approval via email and web ->. Proceed to select the notification or go to the Purchase request screen and view details to be approved

- Select the sign button -> the system displays the Signature popup
 - + . Draw a signature, then press sign → the approval request is sent to the next person in the process. The next person to sign and so on, until all have completed signing, the purchase request status changes from Draft to Approve.
 - + if the approver does not sign Cancel, the approval request is not sent to the next person in the process → purchase request status remains Draft

Purchase request creator also receives email and web notifications when they Approve approval or Deny

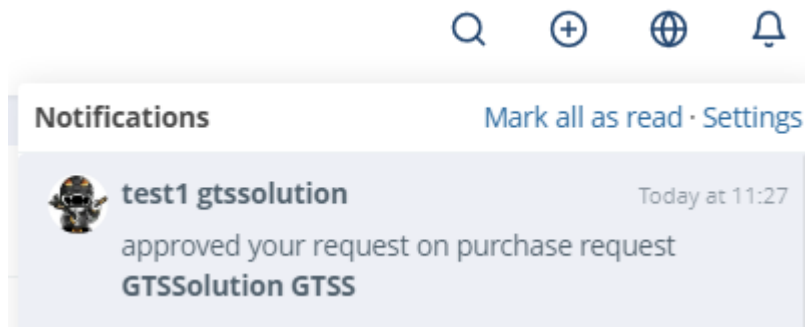

- ❖ For the approval process, including approve + sign

Similar to the approval process to select multiple people for approval, depending on the process of choosing an action, sign is in the last step or not, there are different events.

 - + If the Sign action is not the final step of the process, only when the person completes the signature will the approval request go to the next person
 - + If the Sign action is the final step, only if this person signed, the status of the purchase request changes from Draft to Approve

The creator of the purchase request also receives email and web notifications when Approve or Deny

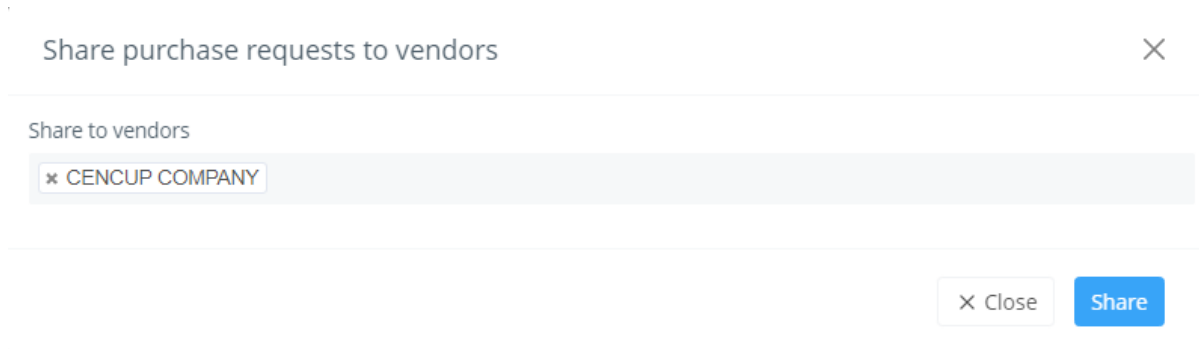

5.7. Share request

Used to share approved purchase requests to the vendor

Step 1. Select Purchase request with status Approved → Click  → Click  Share Request

Step 2. The system displays a popup Share purchase request to vendor -> select vendor then click the Share button

6. Quote

6.1. Add new Quotation

Only purchase requests with Approved status can be used to create quotations

- Step 1: Select the Quotations menu-> Click button  Add Estimate
- Step 2: The system will display the screen Add estimate -> Enter the necessary data, select an available item or select Purchase Request as approved or use the Purchase request as approved and available item at the same time to create a quotation -> Then Click Submit to save the action

A Terms and Conditions agreement (T&Cs) is the agreement that includes the terms, the rules and the guidelines of acceptable behavior and other useful sections to which users must agree in order to use or access your website and mobile app. 2

[Send approval request](#)

* Explanation:

Tab Estimate: display information used

Option **Change status is** to change the status of the Quotation.

Option  to view and download estimate as PDF

Option  to redirect to edit screen.

Tab Attachment is used to upload attachments

Button Send approval request is used to send approval request quotation

6.5. Send approval request and approve

There are 2 cases:

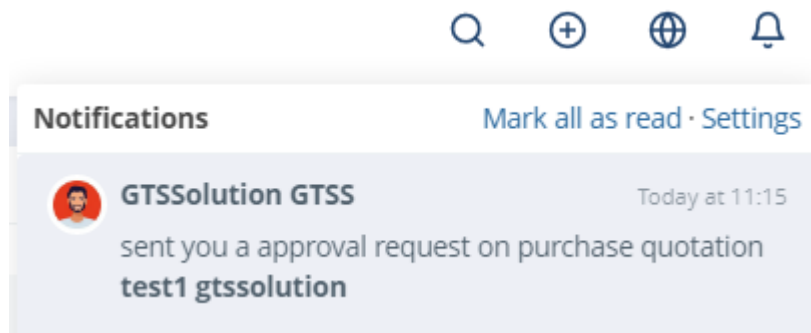

Case 1. No approval process set up ⇒ After creating the estimate successfully, this estimate defaults to approved

Case 2. An approval process is installed. Approve After creating an estimate successfully; this Estimate defaults to Draft

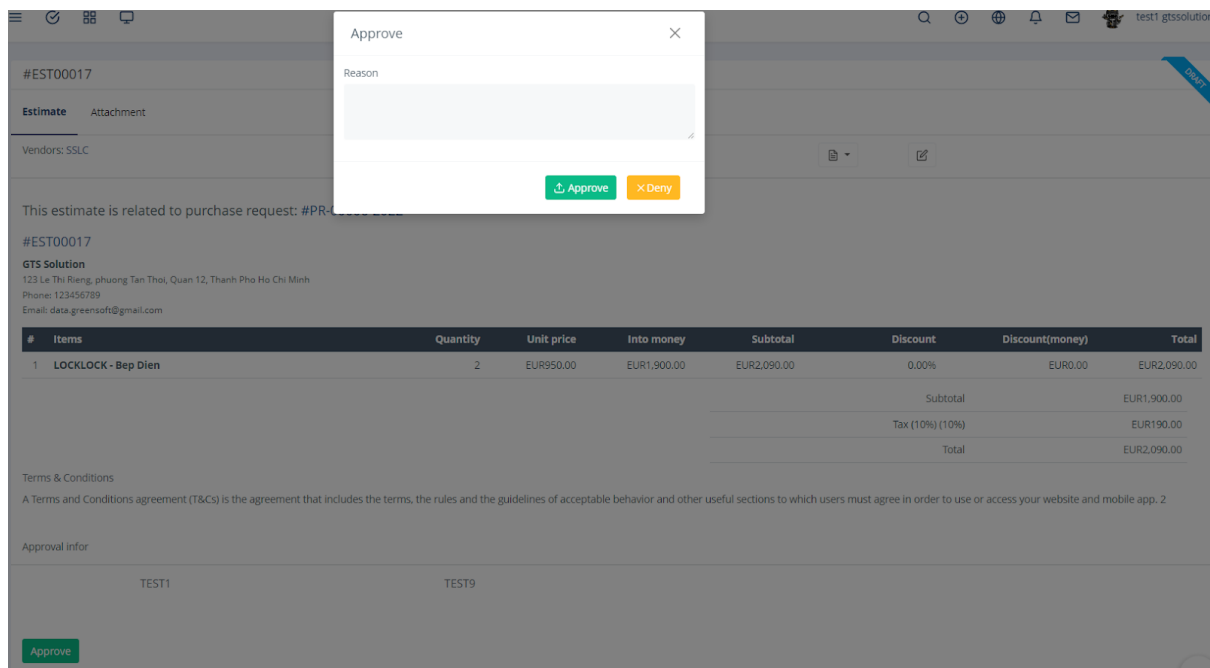

Step 1: Select Estimate as Draft -> Click View

Step 2. : Click [Send approval request](#)

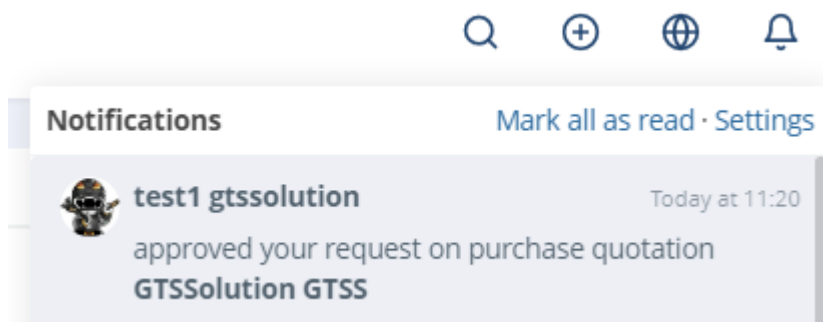

- ❖ For the approval process, select a person to approve
 - The system sends approval requests to the person in the process. Approve people in the process receive a notification requesting approval via email and web ->. Proceed to select the notification or go to the Quotation screen and view the details of the estimate to be approved

- Select the Approve function -> the system will display Displays 2 options: Approve and Deny.
 - + Select Approve to agree and enter a reason (can be entered or not) → Estimate status changes from Draft to Approved
 - + Select Deny to reject and enter a reason if any → Estimate status changes from Draft to Reject.

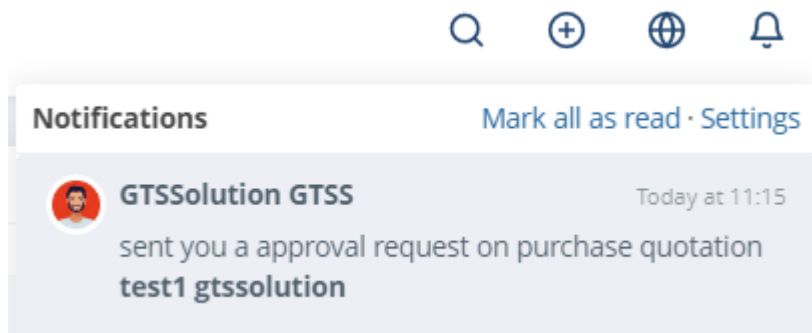

Estimate creators also receive email and web notifications when they Approve or Deny

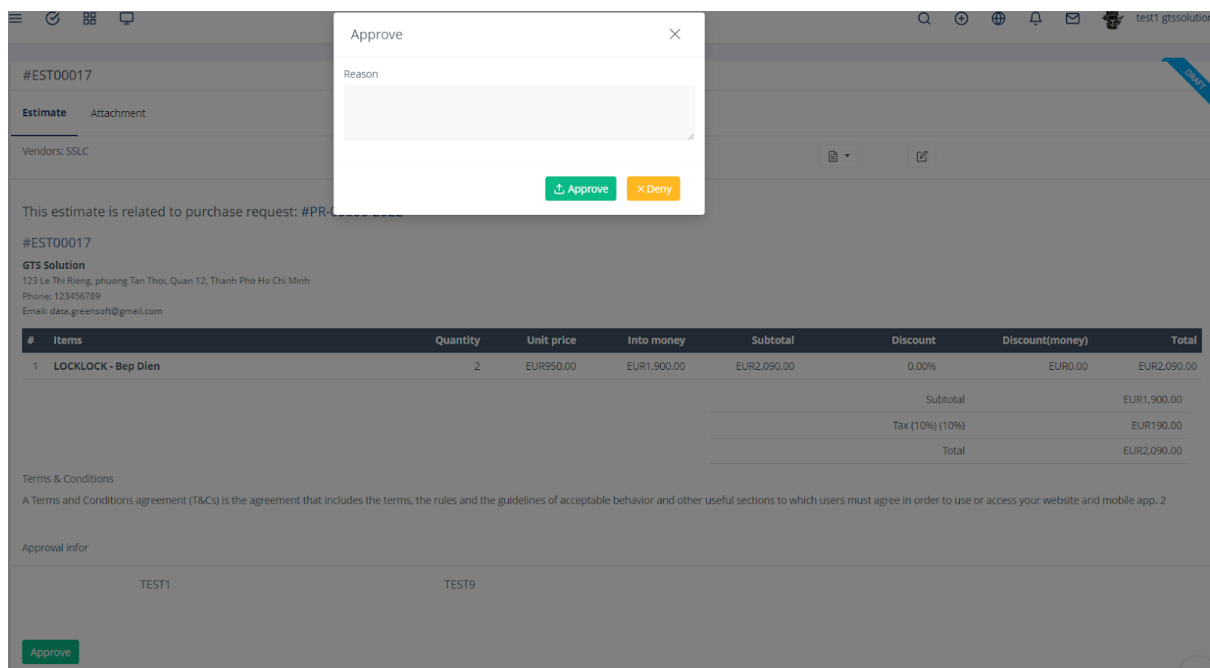

❖ approval

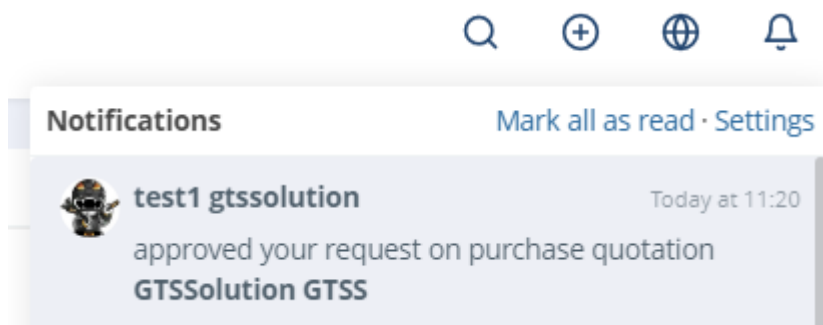

- Is available web -> Proceed to select the notification or go to the Quotation screen and see the estimate details that need approval.

- Select the Approve function -> the system will display two options: Approve and Deny.
 - + Select Approve to agree and enter a reason (can be entered or not) → The estimate status is still Draft, and the approval request is sent to the next person in the process. The next person approves and approves, and so on until all approve, then the estimate status changes from Draft to Approved.
 - + Select Deny to decline and enter a reason (can be entered or not) → The next person in the approval process does not receive the approval request message and cannot continue to approve this estimate. Estimate status changes from Draft to Reject Estimate

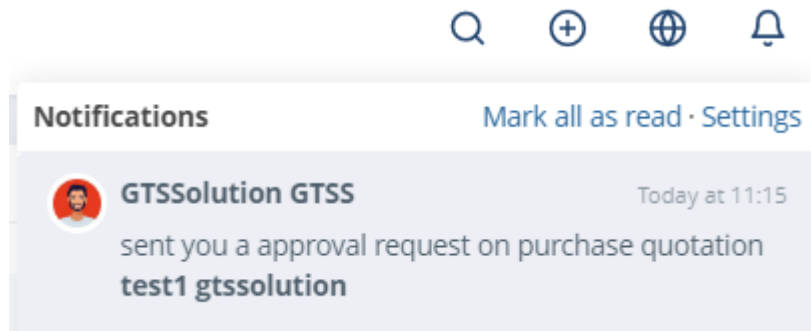

The creator also gets email and web notifications when Approve or Deny approval

- ❖ For the approval process, select one signer

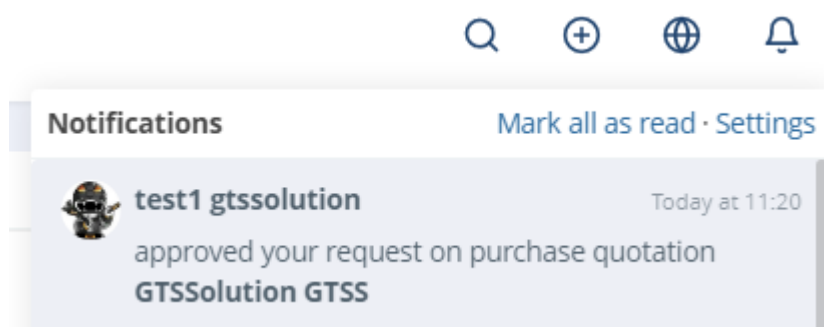

The system sends approval requests to the person in the process. The approver in the process receives a notification requesting approval via email and web ->. Proceed to select the notification or go to the Quotation screen and view the estimate details to be approved

- Select the sign button -> the system displays the Signature popup
 - + Perform signature drawing, then press sign → Estimate status changes from Draft to Approved
 - + if Cancel is clicked, the estimate status is still Draft

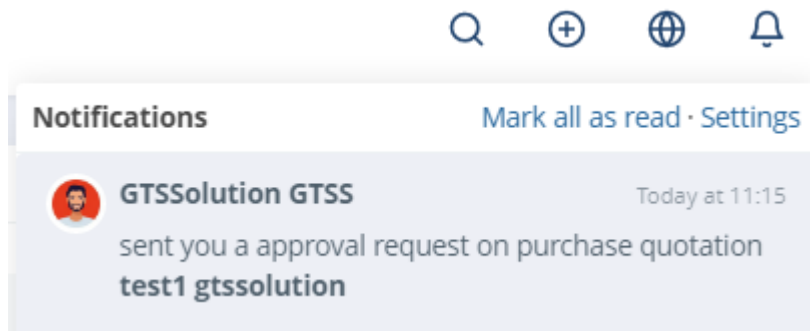

Estimate creator also receive email and web notification when Approved or Deny is approved

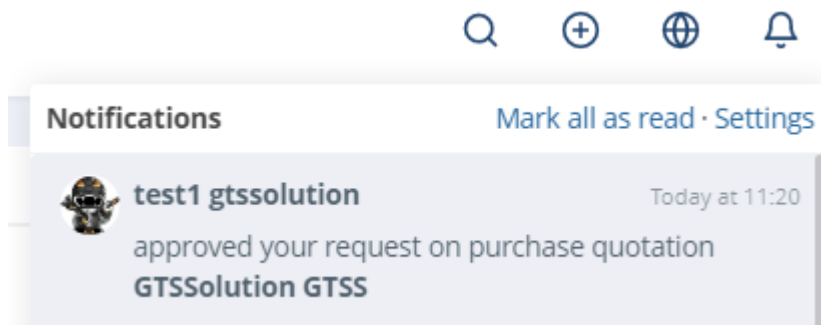

- ❖ For process, the approver selects multiple signers

Only the first person in the approval process will receive a notification requesting approval via email and web ->. Proceed to select the notification or go to the estimate screen and view the estimate details to be approved

- Select the sign button -> the system displays the Signature popup
 - + . Draw a signature, then press sign → the approval request is sent to the next person in the process. The next person to sign and so on until all have completed signing, the estimate status changes from Draft to Approved.
 - + if the approver does not sign the Cancel, the approval request is not sent to the next person in the process → estimate status remains Draft

estimate creator also receives the email and web notifications when Approve or Deny approvals are available

- ❖ With the approval process including approve + sign

Similar to the approval process to select multiple people for approval, depending on the process of choosing an action, the sign is at the last step or not, but there are different events.

 - If the Sign action is not the final step of the process, only when the person completes the signature will the approval request go to the next person
 - If the Sign action is the final step, only if this person Once signed, the estimate status changes from Draft to Approved

7. Purchase Orders

7.1. Add Purchase order

* Note: Every time you create a purchase order, you can only choose 1 of 3 ways:

Option 1: Create a purchase order from an existing item, and the estimate is approved

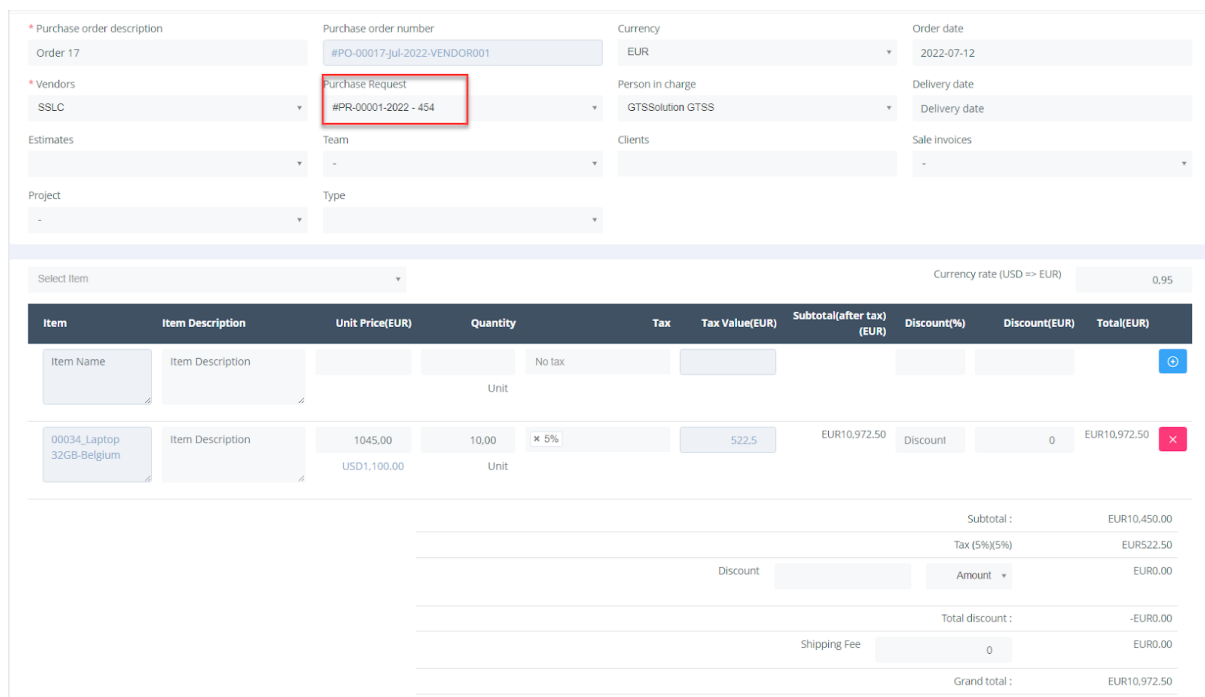

. Method 2. Create a purchase order from an existing item and combine the Purchase request. approved

Method 3. Create a purchase order from an existing item combined with a sale invoice

Method 4. Create a purchase order from an existing item

7.1.1. Create a purchase order from the purchase request

- Step 1: Select menu Purchase Orders-> Click button  Add Purchase Order
- Step 2: The system will display the screen Create new purchase order-> Enter the necessary data, select Purchase Request as approved or simultaneously use Purchase request as approved and available item to create purchase order-> Then click Submit to save the action

Press the button  to delete the added item

Click the button  to add the item to the estimate

*Explanation:

- The Purchase order description field is used to enter the purchase order name
- field Purchase order number field: includes the Prefix and the Number set in the setting
- Field. Currency: get data from Settings->Localization screen. Currencies are quoted in the Vendor primary currency/ Purchase request/Estimate/Sale invoices selected last.
- The default Order date field takes the current date
- Vendors field: get data from the Vendors screen
- Purchase Request field: displays purchase requests with Approved status
- Person in Charge field: select the person in charge. This field data is taken from the staff list

- Delivery Date field: used to select the shipping date, defaults to the current date
- Estimate field: displays estimates with approved status
- Team field: retrieves data from Settings->Access Permission-> Team
- Clients field gets data from Clients' menu
- The sale Invoice field gets data from Sales -> Invoices
- The projects field gets data from the Projects menu
- Type field includes CAPEX and OPEX
- **Select items** used to select available items to add to the purchase order. The data is taken from the Items screen and only shows the items with the Can be purchase check option.
 - If you select an existing item, only the items with the Can be purchase check option can
 - be
 - selected.
 - If a specific sale invoice is selected, display items according to the selected invoice.
- The **Unit price** takes the purchase price of the selected item to display. Or the price of the item from the selected purchase request/estimate/sale invoice. The Unit Price column allows editing
- of the **Quantity** used to enter the Quantity of the item or display according to the selected purchase request/ estimate/ sale invoice.
- The Subtotal field is used to calculate the total value of the item before tax. Subtotal = Quantity* Unit Price
- The Tax field is used to calculate the item's tax. Tax = Quantity* Unit Price * Tax %
- Discount is used to calculate the after-tax discount value. Discount = Quantity* Unit Price * Tax % * Discount %
- The total field is used to calculate the value of each item. Total = Subtotal + Tax - Discount
- The Grand total field is used for the value of the estimate. Grand total = Subtotal + Tax - Discount + Shipping fee
- The vendor note field takes pre-entered content in the General setting
- Terms & Conditions field takes pre-entered content at the General setting

7.1.2. Create a purchase order from the estimate

- Step 1: Select menu Purchase Orders-> Click button 
- Step 2: The system will display the Create new purchase order screen-> Enter the necessary data, select estimate as approved, or use the same estimate as approved and available item to create purchase order-> Then click Submit to save Re-action

Note

This article will get you started with creating your own custom Terms and Conditions agreement. We've also put together a Sample Terms and Conditions Template that you can use to help write your own. 2

Terms & Conditions

A Terms and Conditions agreement (T&Cs) is the agreement that includes the terms, the rules and the guidelines of acceptable behavior and other useful sections to which users must agree in order to use or access your website and mobile app. 2

Send approval request

* Explanation:

- Tab purchase order: display purchase information
- Option **Change status** is used to change the status of the purchase order.

Option  to view and download purchase order information in PDF

Option  to update delivery status, edit or delete the purchase order

- Tab Attachment is used to upload attachments
- Button Send approval request is used to submit purchase order approval request

[7.5. Send approval request and approve](#)

There are 2 cases:

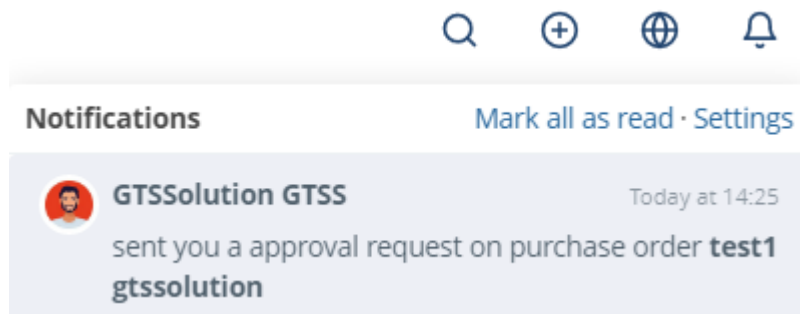

Case 1. No approval process installed ⇒ After creating a successful purchase order, this purchase order defaults to approved

Case 2. There is a set of the rules approval process. After creating a successful purchase order, this purchase order defaults to Draft

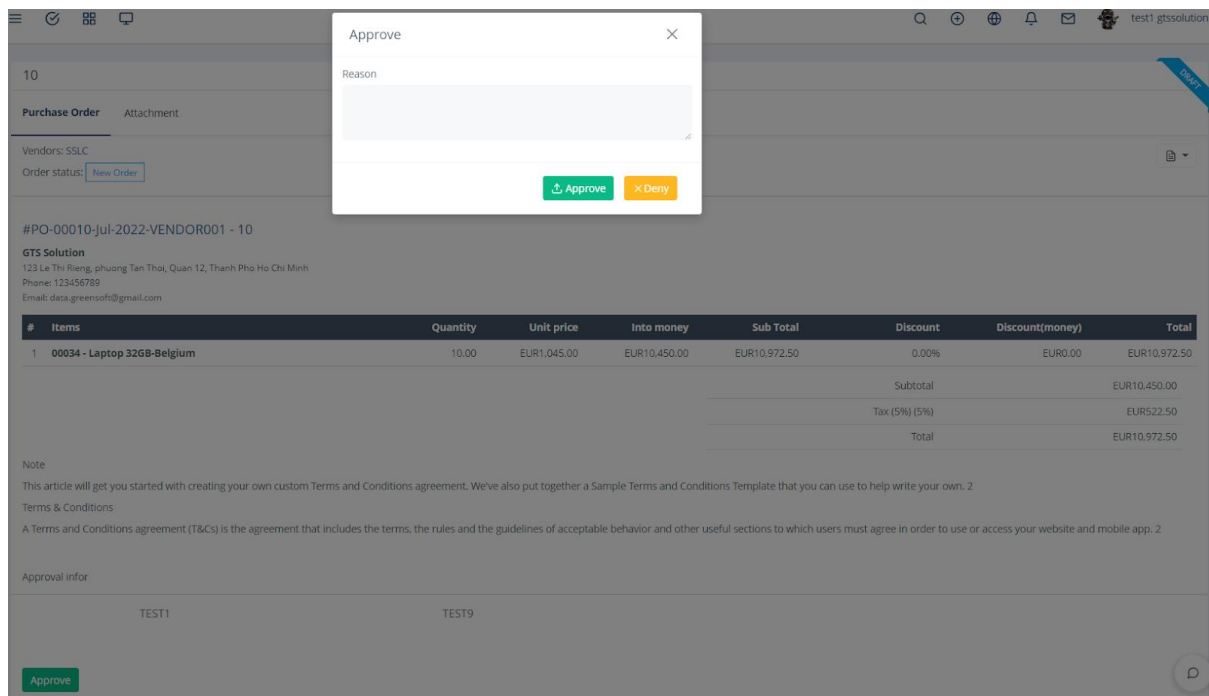

Step 1: Select purchase order as Draft -> Click View

Step 2. : Click 

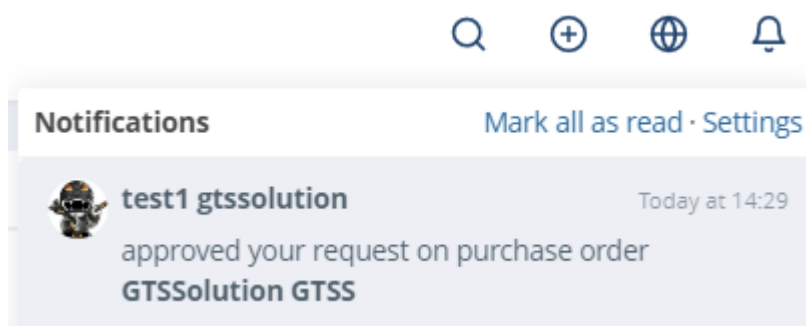

- ❖ For the approval process, select a person to approve
- the system sends the request approval to people in the process. The approver in the process receives a notification requesting approval via email and web ->. Proceed to select the notification or go to the purchase order details purchase order to be approved

- Select the Approve function -> system will display two options, Approve and Deny.
 - + Select Approve to agree and enter a reason (can be entered or not) → Purchase order changes from Draft to Approved
 - + Select Deny to refuse and enter a reason if any → Purchase order changes from Draft to Reject.

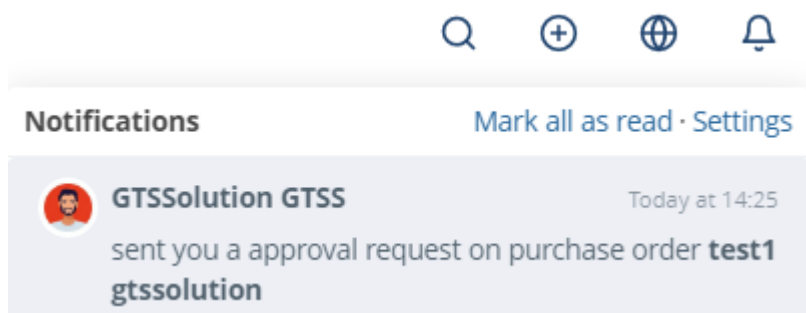

Creators' Purchase orders also receive email and web notifications when Approved or Deny

❖ approval

- Is available and web -> Proceed to select the notification or go to the purchase order details purchase order to be approved.

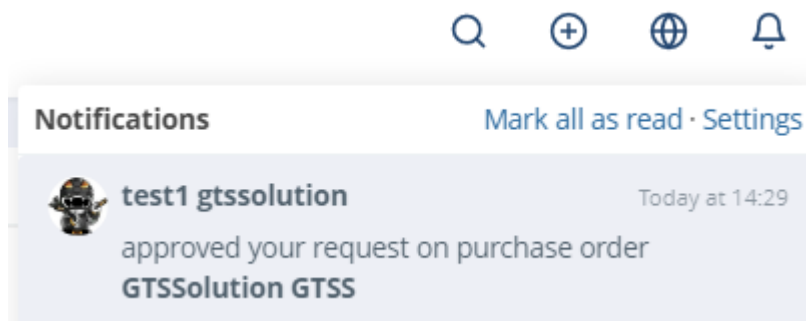

- Select the Approve function -> the system will display two options, Approve and Deny.
 - + Select Approve to agree and enter a reason (can be entered or not) → The purchase order is still Draft, and the approval request is sent to the next person in the process. The next person

proceeds to approve and approve and so on until all approve, then the purchase order changes from Draft to Approved.

- + Select Deny to decline and enter a reason (can be entered or not) → The next person in the approval process does not receive the approval request message and cannot continue to approve the purchase order .status Purchase order changed from Draft to Reject

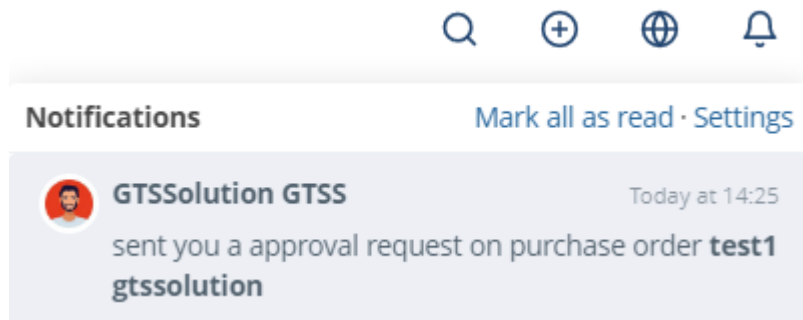

#	Items	Quantity	Unit price	Into money	Sub Total	Discount	Discount(money)	Total
1	00034 - Laptop 32GB-Belgium	10.00	EUR1,045.00	EUR10,450.00	EUR10,972.50	0.00%	EUR0.00	EUR10,972.50
Subtotal								EUR10,450.00
Tax (5%) (5%)								EUR522.50
Total								EUR10,972.50

Creator Purchase orders also receive email and web notification when Approved or Deny approval

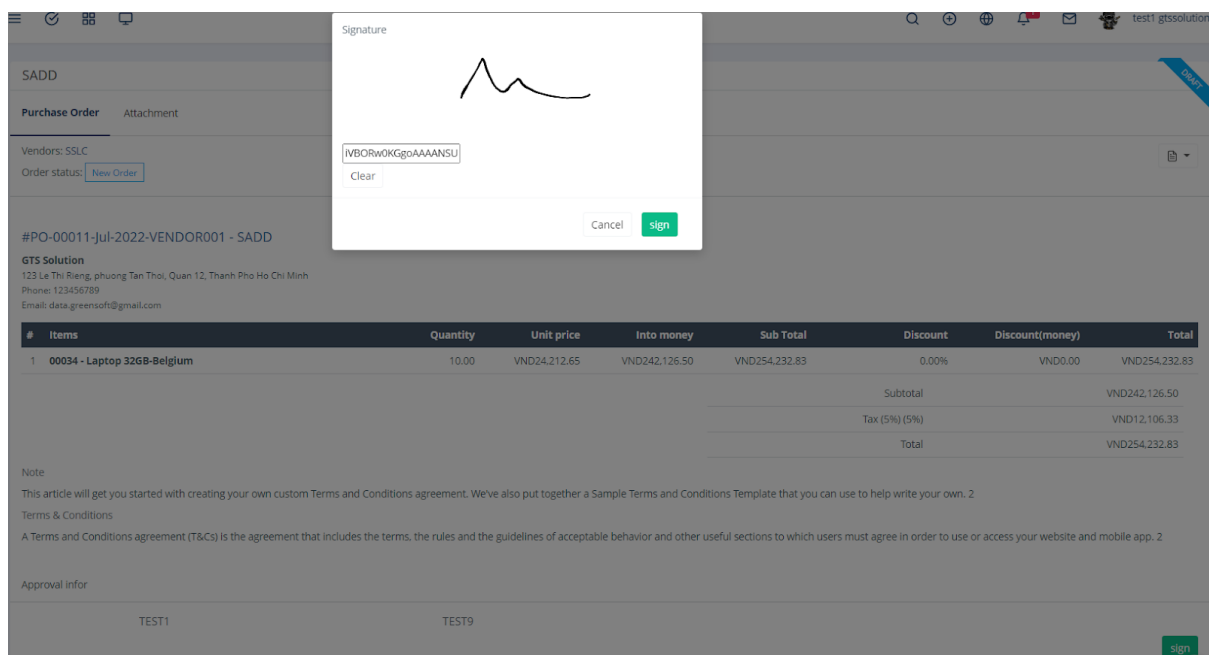

- ❖ For the approval process, select one signer

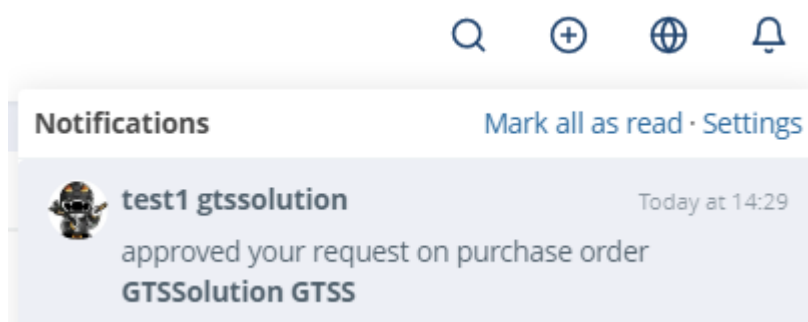

The system sends approval requests to insider procedure. The approver in the process receives a notification requesting approval via email and web ->. Proceed to select the notification or go to the purchase order details purchase order to be approved

- Select the sign button -> the system displays a popup Signature
 - + Draw a signature, then press sign → Purchase order status changes from Draft to Approved
 - + the status purchase order is still Draft

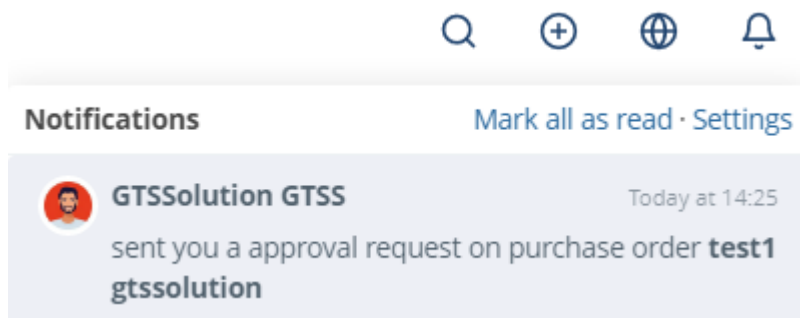

Purchase order creators also receive email and web notifications when Approved is approved or Denied

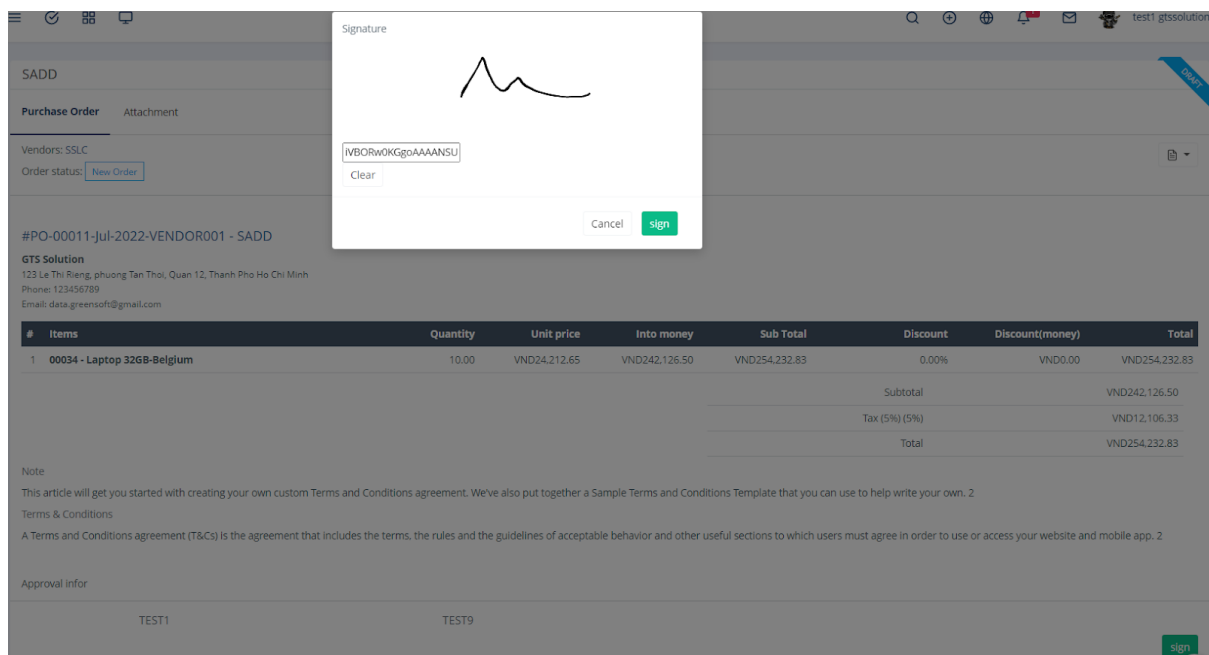

- ❖ For the approval process, select multiple signers

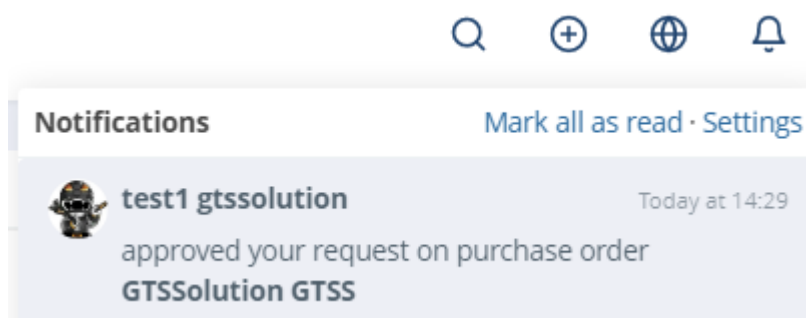

Only the first person in the approval process will receive a notification requesting approval via email and web ->. Proceed to select the notification or go to the purchase order screen and view purchase order details that need approval

- Select the sign button -> the system displays the Signature popup
 - + . Draw a signature, then press sign → the approval request is sent to the next person in the process. The next person to sign and so on, until all have completed signing, the purchase order status changes from Draft to Approved.
 - + If the approver does not sign Cancel, the approval request is not sent to the next person in the process → purchase order status remains Draft

The purchase order creator also receives email and web notifications when Approve approval is available or Deny

❖ For the approval process, including approve + sign

Similar to the approval process to select multiple people for approval, depending on the process of choosing an action, whether the sign is in the last step or not, there are different events.

- If the Sign action is not the final step of the process, only when the person completes the signature will the approval request go to the next person
- If the Sign action is the final step, only if this person, After signing, the purchase order status will change from Draft to Approved

7.6. Convert and view an estimate

Step 1: At the Purchase order screen-> Select the corresponding line you want to convert -> Select the Convert function

8. Invoices

8.1. Add invoice

There are two ways to create an Invoice

Method 1. Create an Invoice from an existing item

Method 2. Create invoice from a purchase order is approved

8.1.1. Create an Invoice from the available item

- Step 1: Select menu Invoices -> Click button 
- Step 2: The system will display the add invoice screen -> Enter the necessary data, select the available item, check the option Can be purchased -> Then click Submit to save the operation

Add invoice

* Invoice number: #BILL00002 * Vendor: VENDOR001 SSLC Currency: EUR Transaction ID:
 Purchase Order: * Invoice date: 2022-07-13 Due Date: 2022-07-13 Transaction date: YYYY-MM-DD

Select Item: Currency rate (USD => EUR): 0,95

Item	Item Description	Unit Price(EUR)	Quantity	Tax	Tax Value(EUR)	Subtotal(after tax) (EUR)	Discount(%)	Discount(money) (EUR)	Total(EUR)
Item Name	Item Description		Unit	No tax					
ITEM3_Item 3	Item Description	950	1	5%	47,5	EUR997,50	Discount	0	EUR997,50
CMC001_Item 1	Item Description	95	1	No tax	0	EUR95,00	Discount	0	EUR95,00

Subtotal: EUR1,045,00
 Tax (5%)(5%): EUR47,50
 Discount: Amount: EUR0,00
 Total discount: -EUR0,00
 Shipping Fee: 0: EUR0,00
 Grand total: EUR1,092,50

Click the button  to delete the added item

Click the button  to add the item to estimate

*Explanation:

- Invoice number field: includes Prefix and Number set in
- Vendors field setting: get data from the vendor's screen
- Currency field: get data from Settings->Localization screen. The currency is taken in the main currency of the Vendor/Purchase order selected last.
- The transaction ID field is used to enter the transaction id
- Purchase order field: displays purchase orders with Approved status that have not been used to create an invoice before
- The invoice date field is used to select the invoice date; the default is the current date.
- The default Due Date field takes the current
- date Transaction date field is used to select the transaction date
- **Select item** is used to select an available item to add to the purchase order. The data is taken from the Items screen and only shows the items with the Can be purchase check option.
 - If an existing item is selected, only items with a Can be purchase check option are
 - selected. If one purchase order is selected, only the purchase orders that have been approved and have not been used to create an invoice are displayed.
- The **Unit price** takes the purchase price of an item selected to display. Or the price of the item from the selected purchase request/estimate/sale invoice. The Unit Price column allows editing
- the **Quantity** used to enter the Quantity of the item or display according to the selected purchase request/ estimate/ sale invoice.
- The Subtotal field is used to calculate the total value of the item before tax. Subtotal = Quantity* Unit Price
- The Tax field is used to calculate the item's tax. Tax = Quantity* Unit Price * Tax %
- Discount is used to calculate the after-tax discount value. Discount = Quantity* Unit Price * Tax % * Discount %

- The total field is used to calculate the value of each item. Total = Subtotal + Tax - Discount
- The Grand total field is used for the value of the estimate. Grand total = Subtotal + Tax - Discount + Shipping fee
- The vendor note field takes pre-entered content in the General setting
- Terms & Conditions field takes pre-entered content at the General setting

8.1.2. Create invoice from purchase order

- Step 1: Select menu Invoices -> Click button 
- Step 2: The system will display the add invoice screen -> Enter the necessary data, select Purchase order as approved or simultaneously use a Purchase order as approved and available item to create invoice -> Then click Submit to save operation

Add invoice

* Invoice number: #BILL00003 * Vendor: VENDOR001 SSLC Currency: EUR Transaction ID:
 Purchase Order: #PO-00010-Jul-2022-VENDOR001 * Invoice date: 2022-07-13 Due Date: 2022-07-13 Transaction date: YYYY-MM-DD

Select Item:
 Currency rate (USD => EUR): 0.95

Item	Item Description	Unit Price(EUR)	Quantity	Tax	Tax Value(EUR)	Subtotal(after tax) (EUR)	Discount(%)	Discount(money) (EUR)	Total(EUR)
Item Name	Item Description			No tax					
00034_Laptop 32GB-Belgium	Item Description	1045.00	10.00	5%	522.5	EUR10,972.50	0.00	0	EUR10,972.50
		USD1,100.00							

* Explanation

The purchase order field shows only approved purchase orders and has not been used to create invoices before

8.2. Edit invoice

*Note: Only purchase orders whose status is Draft and Rejected have the editing function.

Step 1: At the Invoice screen -> Select the corresponding line you want to edit -> Select the Edit function

Approval info

[Send approval request](#)

- Button Send approval request is used to send approval request payment approval

8.7. Send approval request and approve

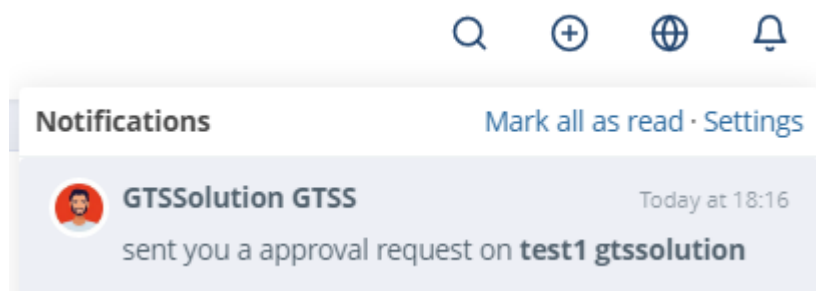

There are 2 cases:

- Case 1. No approval process installed ⇒ After successful payment creation, this Payment defaults to approved → Payment status of invoice changes to Partially paid or Paid.
 - If paying part of the invoice, the Payment status of the corresponding invoice will change to Partially paid
 - If the Payment of the entire Invoice is paid, the Payment status of the corresponding invoice will change to Paid
- . Then this payment defaults to Draft

Step 1: Select Draft -> Click View

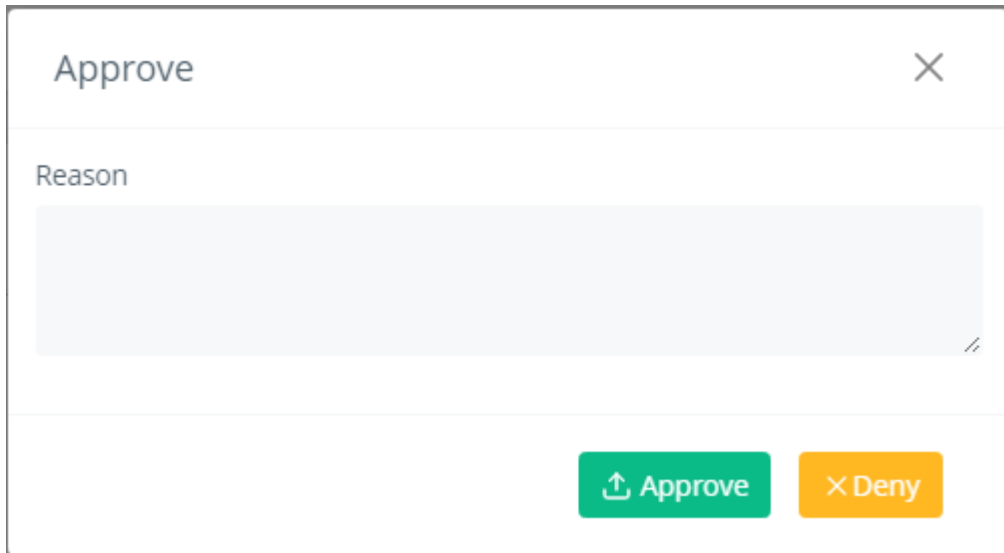

Step 2. : Click [Send approval request](#)

- ❖ For the approval process, select a person to approve
- The system sends an approval request to the person in the process. Approve people in the process receive a notification requesting approval via email and web ->. Proceed to select the notification or go to the invoice details payment to be approved

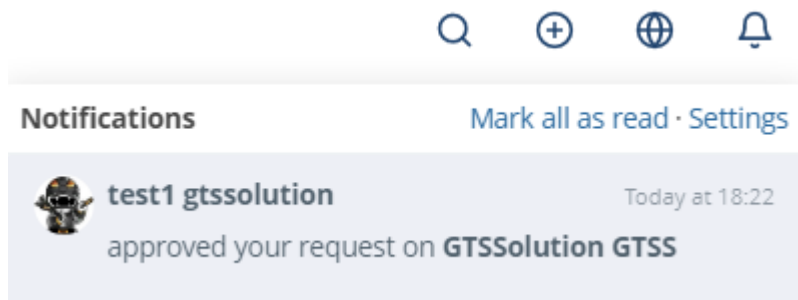

- Select the Approve function -> system will display two options, Approve and Deny.

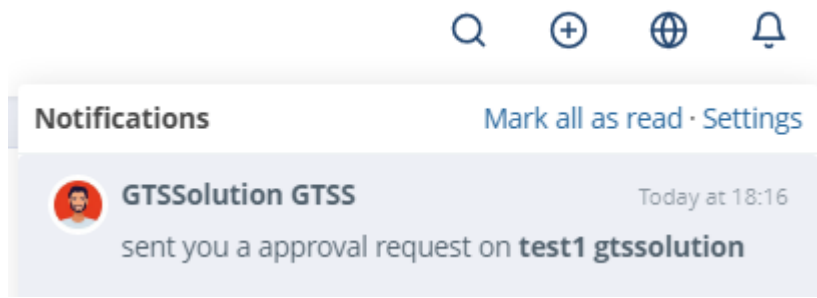

- + Select Approve to agree and enter the reason (can be entered or not) → The payment changes from Draft to Approved
 - If part of the invoice is paid, the Payment status of the corresponding invoice will change to Partially paid
 - If the entire invoice is paid, then the Payment status of the corresponding invoice changes to Paid
- + Select Deny to refuse and enter a reason if any → Payment status changes from Draft to Reject. The payment status of the invoice is still Draft Payment

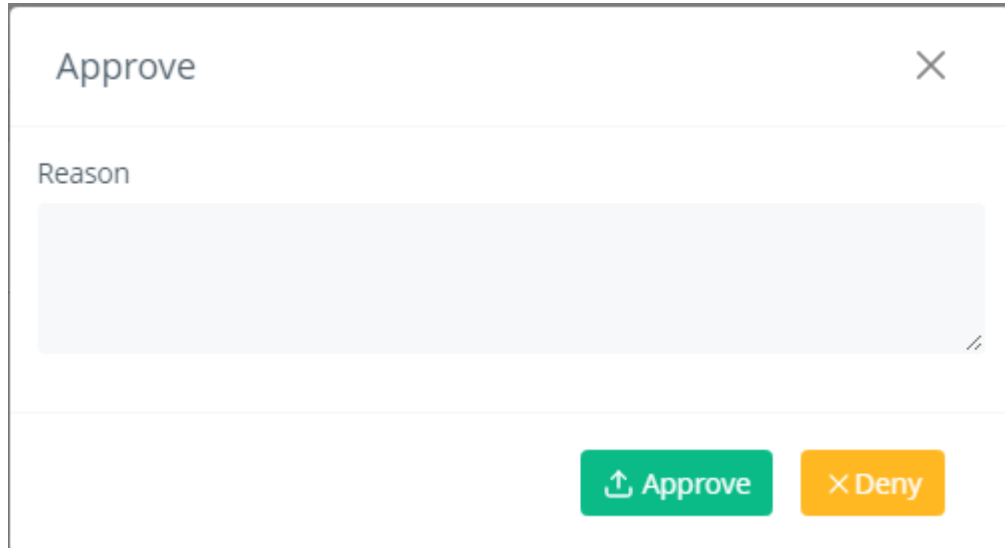

Also, the creator gets email and web notifications when Approve or Deny approval

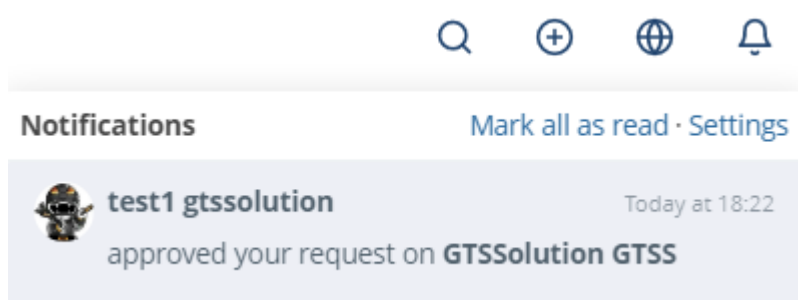

- ❖ For the approval process, select multiple people to approve
- Only the first person in the approval process will get a notification to notify the approval request via email and web ->. Proceed to select the notification or go to the invoice details payment to be approved
-

- Select the Approve function -> the system will display two options: Approve and Deny.
 - + Select Approve to agree and enter a reason (can be entered or not) → Payment status is still Draft, and approval request is sent to the next person in the process. The next person proceeds to approve and approve and so on until all approve, then the Payment status changes from Draft to Approved.
 - If paying part of the invoice, the Payment status of the corresponding invoice will change to Partially paid
 - If paying the entire invoice, the Payment status of the corresponding invoice will change to Paid
 - + Select Deny to refuse and enter the reason (can be entered or not) → The next person in the approval process does not receive the approval request notification and cannot continue to approve this Payment. Payment status changed from Draft to Reject -> Payment status of the invoice is still Draft Payment

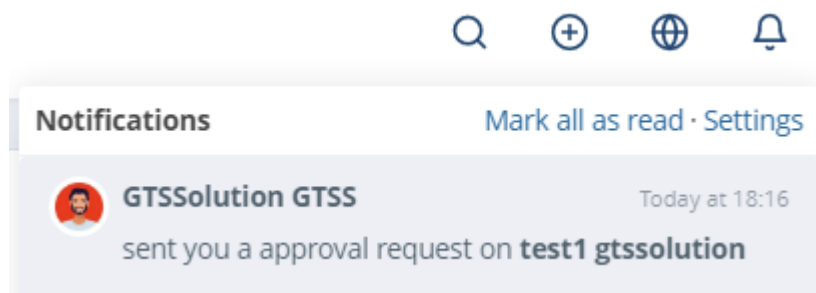

A modal form titled "Approve" with a close button (X) in the top right corner. Below the title is a label "Reason" followed by a large text input area. At the bottom right, there are two buttons: a green button with an upward arrow icon and the text "Approve", and an orange button with an X icon and the text "Deny".

Also, creators receive email and web notifications when they Approve or Deny approval

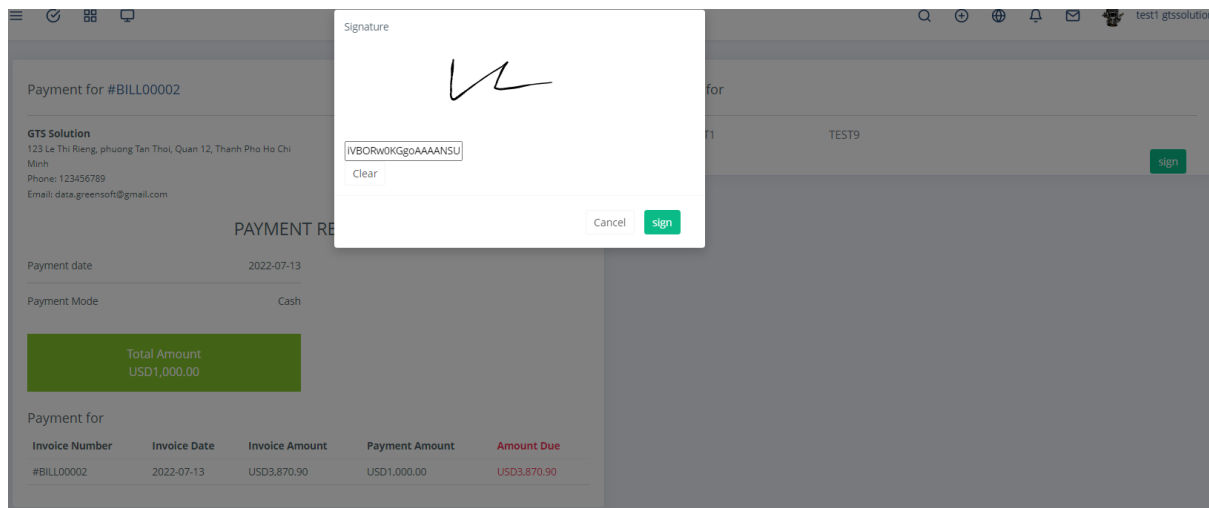

❖ For the approval process, choose one signer

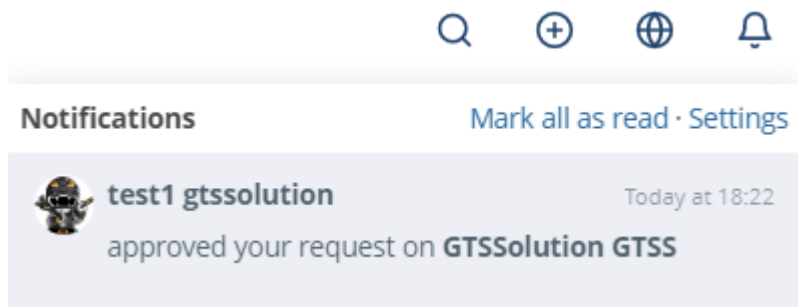

Sending system request approval to the person in the process. The approver in the process receives a notification requesting approval via email and web ->. Proceed to select the notification or go to the invoice details payment to be approved

- Select the sign button -> the system displays a popup Signature
 - + Draw a signature, then click sign → status changes from Draft to Approved
 - If part of the invoice is paid, the Payment status of the corresponding invoice changes to Partially paid
 - If the entire invoice is paid, the Payment status of the corresponding invoice changed to Paid
 - + status payment is still Draft -> Payment status of the invoice is still Draft Payment

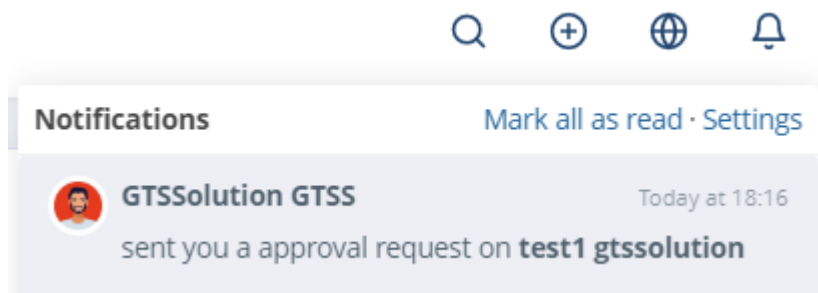

Also, creators receive email and web notifications when they Approve or Deny approval

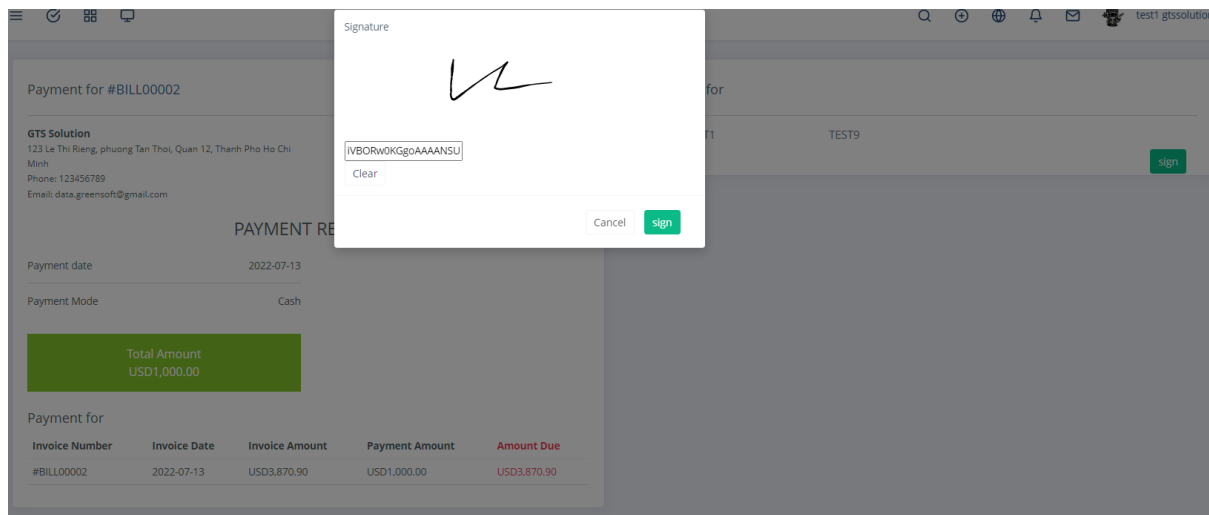

❖ For the multi-select approval process sign

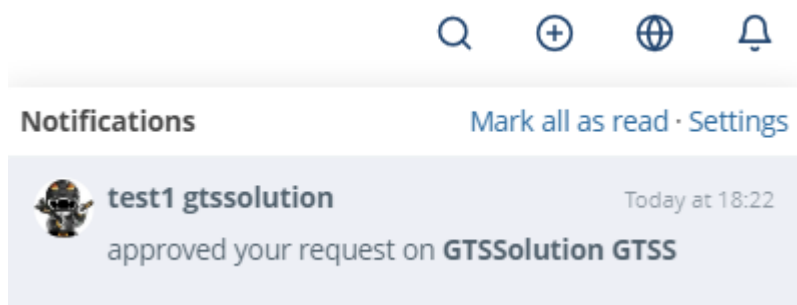

Only the first person in the approval process will receive a notification requesting approval via email and web ->. Proceed to select the notification or go to the invoice details payment to be approved

- Select the sign button - > system ng displays the Signature popup
 - + Perform signature drawing, then press sign → approval request is sent to the next person in the process. The next person signs, and so on; until all have completed signing, the payment changes from Draft to Approved.
 - If paying part of the invoice, the Payment status of the corresponding invoice changes to Partially
 - paid
 - + . Next person in the process → payment is still Draft -> Payment status of the invoice is still Draft Payment

The creator receives email and web notifications when Approve or Deny approval

❖ For approval process, including approval + sign

Similar to the approval process to select multiple people for approval, depending on the process of choosing the action, Sign is in the last step or not, there are different events.

- If the Sign action is not the final step of the process, only when this person completes the signature will the approval request go to the next person
- If the Sign action is the final step, only if this person After signing, the payment changes from Draft to Approved

Only Display Purchase Requests shared by admin

2.1. View

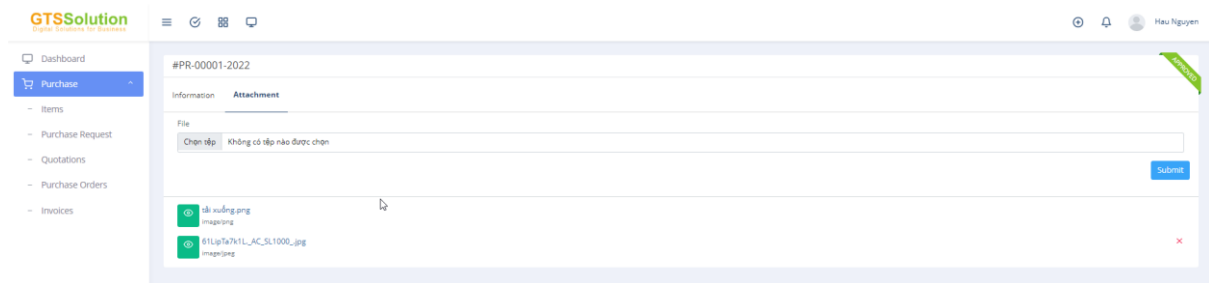

Select the Purchase Request screen -> select the corresponding line you want to see

details -> click on the hyperlink of the Purchase Request Code or select  -> then select View

2.2. Attachment

Used to attach related files or images. The vendor and admin can see all uploaded files related to this Purchase Request

The vendor can only delete attachments uploaded by the vendor

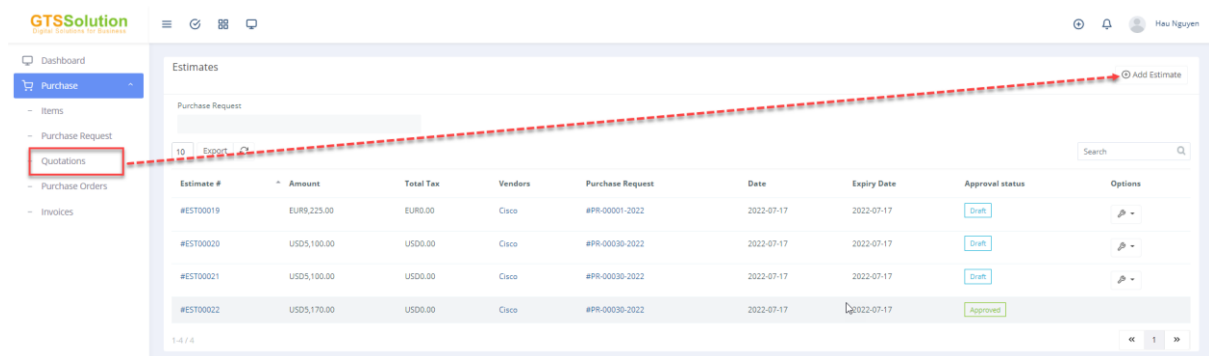

Click  to preview attachments.

3. Quotations – Vendor Portal

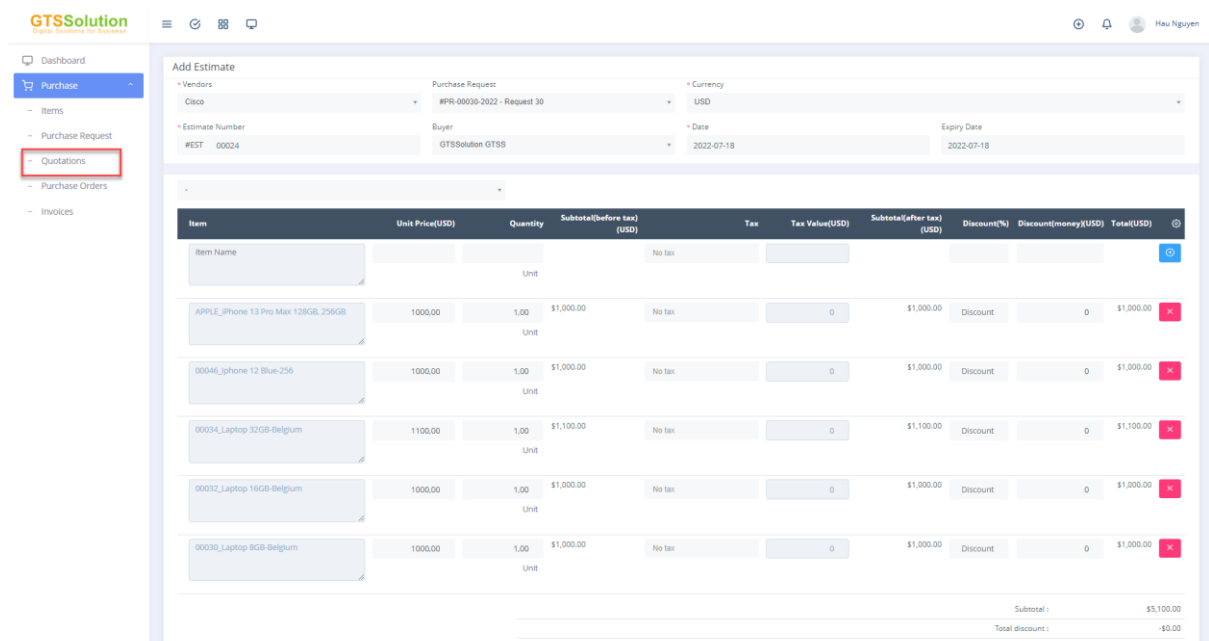

Used to create quotes for admin.

3.1. Add Quotation

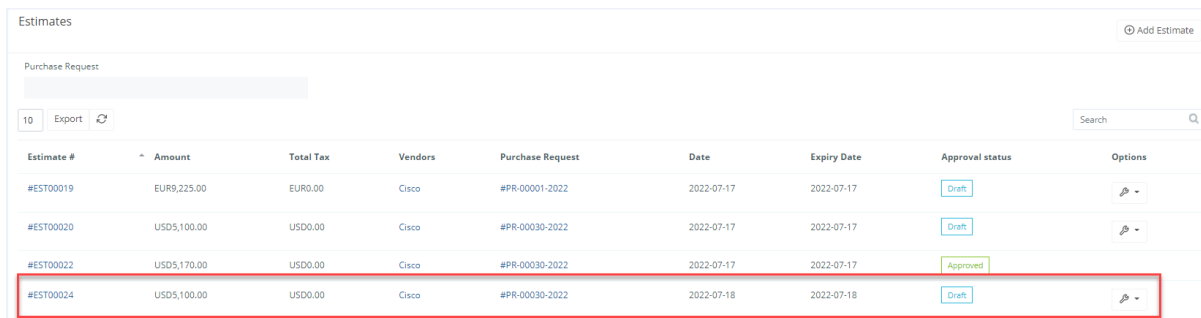

Step 1: Select the Quotations menu-> Select the Add Estimate button

- Step 2: The system will display the Add Estimate screen-> Select Purchase Request to create a quote, then enter the necessary data -> Then click Submit to save the action

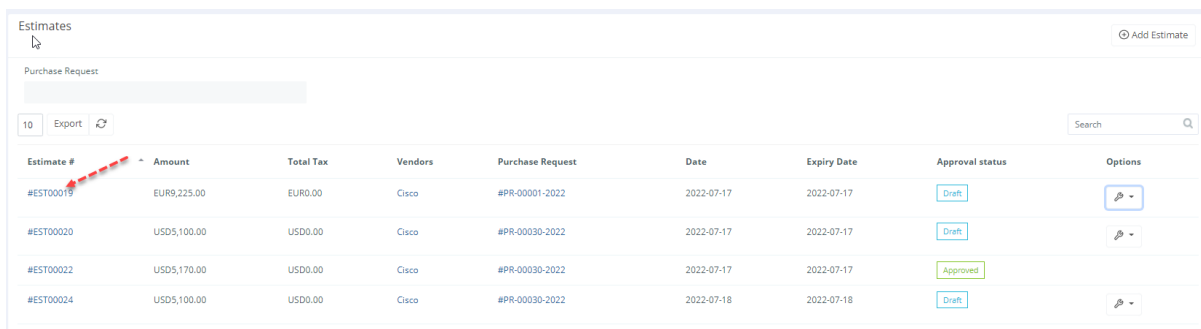

If the admin has created an approval process for Quotation, when the estimate has just been created, the Approval status has Draft status. Only when the admin completes approval will the status be changed to Approved /Deny, respectively.

Estimate #	Amount	Total Tax	Vendors	Purchase Request	Date	Expiry Date	Approval status	Options
#EST00019	EUR9,225.00	EUR0.00	Cisco	#PR-00001-2022	2022-07-17	2022-07-17	Draft	
#EST00020	USD5,100.00	USD0.00	Cisco	#PR-00030-2022	2022-07-17	2022-07-17	Draft
